

Traffic Management

Service Description

The management of traffic on the road network within the City of Glenorchy is shared between the Transportation Section of the Glenorchy City Council and the State Government Department of Infrastructure, Energy & Resources (DIER).

Most of the roads in Glenorchy are owned and maintained by Glenorchy City Council. However, the State Government owns and maintains the Brooker Highway and Goodwood Main Road. Any enquiries related to these roads should be directed to [DIER](#).

Traffic Signals

DIER are also responsible for the installation and maintenance of traffic signals. If you have an enquiry about the operation of traffic signals or to report a fault please phone 1300 139 933 (DIER – Traffic Signals).

Linemarking & Signage

DIER are responsible for the installation of road line marking and the provision of regulatory signs (with the exception of lines and signs related to car parking). Any issues relating to the need for new linemarking or signage or the maintenance of existing signs and lines should be referred to the Traffic Engineer (6216 6310 or email gccmail@gcc.tas.gov.au) who will pass it onto DIER.

Traffic Calming

Traffic calming involves the use of physical devices, streetscaping treatments and other measures to influence vehicle operation in order to create safer and more liveable local streets.

Council are developing a traffic management strategy for the City of Glenorchy which will include a set of guidelines for the investigation of public requests for the installation of traffic calming devices.

In the meantime, if you are interested in having traffic calming measures implemented in your street please call 6216 6310 or email gccmail@gcc.tas.gov.au.

Street Lighting

Council's street lighting system illuminates footpaths and some roads and intersections. Aurora Energy maintains the streetlighting and arranges for replacement of bulbs when required.

Streetlights that are not working should be reported to Aurora Energy on telephone 13 20 04.

If you have a request to modify or install new streetlights please call (03) 6216 6310 or email gccmail@gcc.tas.gov.au.

Road Closures for Works or Special Events

The Glenorchy City Council has the authority to close local roads for the purposes of conducting special events or to facilitate construction activities.

For more information on temporary road closures please contact the Traffic Engineer on 6216 6310 or email gccmail@gcc.tas.gov.au.
