

Hiring an Anti-Barking Collar

Service Description

The **ABS Anti-Barking Collar** is Scientifically proven the most effective, the quickest and most viable solution for the problem of excess barking. The citronella spray poses no threat to the dogs, humans, or the environment. **ABS Anti-Barking Collar** can be used safely at all times, since there are no side effects to worry about. The **ABS Anti-Barking Collar** is highly efficient in kennels, grooming salons, shelters, as well as veterinary clinics. Studies have shown a significant drop in decibel counts within these areas.

The **ABS Anti-Barking Collar** device allows you to reduce or eliminate barking without the nasty after-effects of punishment. In fact, the citronella spray is not punishment. It disrupts behaviour without inflicting fear or pain to the animal. It eliminates barking faster than any other method, whether you are there or not. If you are at grips with problem barking, we strongly urge you to act now. The longer you let the situation degenerate, the more the barking will persist and disturb you, and your neighbours.

How does it work? Every time your dog barks, the electronic bark-sensing unit releases a painless spray of citronella in front of the dog's snout. Your dog hears it, sees it, feels it, and smells it! At the first spray of citronella, your dog's natural curiosity will be to seek the origin of the new odour. The dog will very quickly learn that when he or she barks, the **ABS Anti-Barking Collar** Sprays! Through this harmless conditioned reflex, the **ABS Anti-Barking Collar** discourages your dog from barking. In a few days, the dog learns to keep quiet while wearing the collar and concentrate on more normal activities.

The **ABS Anti-Barking Collar**, a self-sufficient product, requires limited human intervention; (other than changing the batteries, refilling with the citronella) it will work even if you are not there. Should you want to reverse the effects of the **ABS Anti-Barking Collar**, just stop using the device. Ultimately, the animal may be

trained to cease barking without having to wear the device. **ABS Anti-Barking Collar** is one humane solution to the problem of nuisance barking.

How to use this service

Council currently has an Anti-barking collar hire service where dog owners can try before they buy. Knowing that the collar will be successful in your situation is very reassuring before purchasing a collar. To take advantage of this service you must be a resident in the Glenorchy City Council municipality. There is a hire fee of \$15.00 for the 7-day trial period.

Collars can be purchased through Council and if necessary a direct debit term deposit term account can be established.

To be added to the waiting list to trial a collar please phone our Senior Animal Management Officer on 62 166 399.
