

## NOISE MANAGEMENT

### Service Description

The intention of this service is to maintain an harmonious noise level in your neighbourhood.

Council would like to advise any person who has a problem with a 'noisy neighbour' that the ideal approach is to talk to them and work together on a solution to settle the problem. Sometimes noisy neighbours are not aware that they are making unreasonable noise, or that they could be annoying or disturbing you. Often talking to them can lead to changes that will benefit you both. Council should only become involved in a noise nuisance situation as a last resort.

### How to use this service

If you have a concern relating to a noise issue or other local environmental issues such as air, land and water pollution, please contact Environmental Health on 62166797.
