Guide to measuring the volume of waste in a 6x4 foot trailer.

As a general guide a 6' x 4' trailer loaded 45cm (18inches) high will contain 1 cubic metre of material, and the disposal charge will depend on whether it is above or below this level. The charge will be calculated on volume, and not on whether the material can be further compacted to represent a lesser amount.

Between 2-3m³
\$15.00

Between 1-2m³
\$9.00

Less than 1m³
\$6.00
